

Recombinant Human CFHR5, GST-tagged

Cat. No. CFHR5-922H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human CFHR5 fused with GST-tag at N-terminal, was expressed in vitro wheat germ.
Species	Human
Source	Wheat Germ
Description	A mutation in CHFR5 was found in patients with the disease CFHR5 nephropathy, which is a common cause of renal disease in Cyprus. The mutated form of the protein found in patients with this disease has impaired ability to bind to complement C3, suggesting that CFHR5 is important in protecting the kidneys from attack by the complement system.
