

Recombinant Human FLT3LG protein, N-His-tagged

Cat. No. FLT3LG-157H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human FLT3LG protein (Thr27-Pro185) was fused to His-tag at the N-terminus and expressed in Baculovirus-Insect cells.
Species	Human
Source	Insect Cells
ProteinLength	Thr27-Pro185
Description	FLT3L, also known as flt3 ligand, is a small molecule that acts as a growth factor that increases the number of immune cells by activating the hematopoietic progenitors. In vivo, FLT3L also induces the mobilization of the hematopoietic progenitors and stem cells. This may help the system to kill cancer cells. Dendritic cells (DCs) provide the key link between innate and adaptive immunity by recognizing pathogens and priming pathogen-specific immune responses. FLT3L controls the development of DCs and is particularly important for plasmacytoid DCs and CD8 -positive classical DCs and their CD133 -positive tissue counterparts.
Predicted N Terminal	His
Form	Lyophilized from sterile 20mM Tris, 500mM NaCl, pH 7.4 Normally 5% - 8% trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.
Molecular Mass	The recombinant human human FLT3LG consists of 175 amino acids and predicts a

molecular mass of 20.2 KDa. It migrates as an approximately 27 KDa band in SDS-PAGE under reducing conditions.

Endotoxin < 1.0 EU per µg of the protein as determined by the LAL method.

Purity > 95% as determined by SDS-PAGE

Stability Samples are stable for up to twelve months from date of receipt at -20°C to -80°C.

Storage Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 mg/ml. Centrifuge the vial at 4°C before opening to recover the entire contents.

Shipping In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature.
Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise.

GENE INFORMATION

Gene Name FLT3LG

Official Symbol FLT3LG

Synonyms FL; FLG3L; FLT3L

Gene ID 2323

mRNA Refseq NM_001204502.2

Protein Refseq NP_001191431.1

MIM 600007

UniProt ID P49771

Activity of FLT3LG-157H

Measured in a cell proliferation assay using BaF3 mouse proB cells transfected with mouse Flt3. The ED50 for this effect is typically 2-11 ng/mL.

SDS-PAGE of FLT3LG-157H
