

## Recombinant Mouse Grcc10 Protein, MYC/DDK-tagged

Cat. No. Grcc10-1057M    Lot. No. (See product label)

### SPECIFICATION

|                         |                                                                                                                                                      |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Purified recombinant protein of full-length mouse gene rich cluster, C10 gene (Grcc10), with C-terminal MYC/DDK tag, was expressed in HEK293T cells. |
| <b>Species</b>          | Mouse                                                                                                                                                |
| <b>Source</b>           | HEK293                                                                                                                                               |
| <b>Description</b>      | In brain, may be required for corpus callosum development.                                                                                           |
| <b>Molecular Mass</b>   | 13.2 kDa                                                                                                                                             |
| <b>Purity</b>           | >80% as determined by SDS-PAGE and Coomassie blue staining                                                                                           |
| <b>Stability</b>        | Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.        |
| <b>Storage</b>          | Store at -80 centigrade after receiving vials.                                                                                                       |
| <b>Concentration</b>    | >50 g/mL as determined by microplate BCA method                                                                                                      |
| <b>Storage Buffer</b>   | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                                                                                |

### GENE INFORMATION

|                  |                                                                          |
|------------------|--------------------------------------------------------------------------|
| <b>Gene Name</b> | Grcc10 gene rich cluster, C10 gene [ <i>Mus musculus</i> (house mouse) ] |
