

Recombinant Mouse Hbb-b2 Protein, MYC/DDK-tagged

Cat. No. Hbb-b2-1098M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Purified recombinant protein of Mouse hemoglobin, beta adult minor chain,(cDNA clone MGC:40691 IMAGE:3988455) full length, with C-terminal MYC/DDK tag, was expressed in HEK293T cells.
Species	Mouse
Source	HEK293
Description	This gene encodes a beta polypeptide chain found in adult hemoglobin, which consists of a tetramer of two alpha chains and two beta chains, and which functions in the transport of oxygen to various peripheral tissues. This gene is one of a cluster of beta-hemoglobin genes that are distally regulated by a locus control region, and which are organized along the chromosome in the order of their developmental expression. In mouse, two major strain-specific haplotypes of the beta-globin gene cluster are found - a "single" haplotype found in C57BL/-type strains, which includes two highly similar adult beta-globin genes, beta s and beta t, and a "diffuse" haplotype found in strains such as BALB/c and 129Sv, which includes two somewhat diverse adult beta-globin genes, beta-major and beta-minor. This gene represents the beta-minor adult gene found in the "diffuse" haplotype. Primary chromosome 7 of the mouse reference genome assembly, which is derived from C57BL/6 strain mice, represents the "single" haplotype, while the "diffuse" haplotype is represented in the reference genome collection by the BALB/c strain alternate contig, NT_095534.1.
Molecular Mass	23.2 kDa

 45-1 Ramsey Road, Shirley, NY 11967, USA

Purity	>80% as determined by SDS-PAGE and Coomassie blue staining
Stability	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
Storage	Store at -80 centigrade. Avoid repeated freeze-thaw cycles. Stable for at least 3 months from receipt of products under proper storage and handling conditions.
Concentration	>50 g/mL as determined by microplate BCA method
Storage Buffer	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.
Full Length	Full L.

GENE INFORMATION

Gene Name	Hbb-b2 hemoglobin, beta adult minor chain [<i>Mus musculus</i> (house mouse)]
Official Symbol	Hbb-b2
Synonyms	Hbb-b2; hemoglobin, beta adult minor chain; Hbb2; Hbbt2; beta2; AI036344; hemoglobin subunit beta-2; beta min; beta minor globin
Gene ID	15130
mRNA Refseq	NM_016956
Protein Refseq	NP_058652
UniProt ID	P02089
