

Recombinant Human SGSH, GST-tagged

Cat. No. SGSH-280H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human SGSH (1 a.a. - 502 a.a.) fused with GST-tag at N-terminal, was expressed in vitro wheat germ expression system.
Species	Human
Source	Wheat Germ
Description	This gene encodes one of several enzymes involved in the lysosomal degradation of heparan sulfate. Mutations in this gene are associated with Sanfilippo syndrome A, one type of the lysosomal storage disease mucopolysaccharidosis III, which results from impaired degradation of heparan sulfate. Transcripts of varying sizes have been reported but their biological validity has not been determined.
Molecular Mass	83.1 kDa
