

Recombinant HCoV-NL63 N protein, His-tagged

Cat. No. N-239V **Lot. No.** (See product label)

SPECIFICATION

Product Overview	HCoV-NL63 Nucleocapsid, His Tag is expressed from E.coli cells. It contains AA Met 1 - His 377 (Accession # Q6Q1R8-1).
Species	HCoV-NL63
Source	E.coli
ProteinLength	Met 1 - His 377
Description	Nucleocapsid protein is a most abundant protein of coronavirus. Nucleocapsid protein is a highly immunogenic phosphoprotein also implicated in viral genome replication and in modulating cell signaling pathways. While screening for ADP-ribosylated proteins during coronavirus (CoV) infection, we identified as the viral nucleocapsid (N) protein. Novel post-translation modification of the CoV N protein that may play a regulatory role for this important structural protein. The array of diverse functional activities accommodated in the hantaviral N protein goes far beyond to be a static structural protein and makes it an interesting target in the development of antiviral therapeutics. Because of the conservation of N protein sequence and its strong immunogenicity, the N protein of coronavirus is chosen as a diagnostic tool.
Predicted N Terminal	His
Form	Please contact us for detailed information.
Molecular Mass	The protein has a calculated MW of 44 kDa.

Storage

For long term storage, the product should be stored at lyophilized state at -20°C or lower.

Please avoid repeated freeze-thaw cycles.

This product is stable after storage at:

- 20°C to -70°C for 12 months in lyophilized state;
- 70°C for 3 months under sterile conditions after reconstitution.

Reconstitution

It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.

GENE INFORMATION

Gene Name [HCNV63gp6 nucleocapsid protein \[Human coronavirus NL63 \]](#)

Official Symbol [HCNV63gp6](#)

Synonyms Nucleocapsid protein; NP; Protein N; COVID-19

Gene ID [2943504](#)

Protein Refseq [YP_003771.1](#)

UniProt ID [Q6Q1R8](#)
