

Recombinant Human CLMP, His-tagged

Cat. No. CLMP-7756H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Adipocyte Adhesion Molecule/ASAM produced by transfected human cell is a secreted protein with sequence (Thr19Met233) of Human ASAM fused with a polyhistidine tag at the Cterminus.
Species	Human
Source	HEK293
Description	Adipocyte Adhesion Molecule (ASAM) is a type I transmembrane protein and member of the CTX family within the immunoglobulin superfamily. ASAM may be involved in the cellcell adhesion, play an important role in adipocyte differentiation and development of obesity. ASAM can be expressed in the skeletal, heart, colon, spleen, muscle, lung and kidney with high level, and in the peripheral blood leukocytes and liver with low level. The extracellular region of ASAM consists two potential Nlinked glycosylation sites, and two immunoglobulin domains, one Vtype and one C2type.
Form	Lyophilized from a 0.2 µM filtered solution of 20mM PB, 150mM NaCl, pH 7.2
