

Recombinant Human CD163 Protein, MYC/DDK-tagged, C13 and N15-labeled

Cat. No. CD163-064H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CD163 MS Standard C13 and N15-labeled recombinant protein (NP_004235) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The protein encoded by this gene is a member of the scavenger receptor cysteine-rich (SRCR) superfamily, and is exclusively expressed in monocytes and macrophages. It functions as an acute phase-regulated receptor involved in the clearance and endocytosis of hemoglobin/haptoglobin complexes by macrophages, and may thereby protect tissues from free hemoglobin-mediated oxidative damage. This protein may also function as an innate immune sensor for bacteria and inducer of local inflammation. Alternatively spliced transcript variants encoding different isoforms have been described for this gene.
