

Recombinant Human AKAP7 Protein, MYC/DDK-tagged, C13 and N15-labeled

Cat. No. AKAP7-101H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	AKAP7 MS Standard C13 and N15-labeled recombinant protein (NP_004833) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the A-kinase anchoring protein (AKAP) family, a group of functionally related proteins that bind to a regulatory subunit (RII) of cAMP-dependent protein kinase A (PKA) and target the enzyme to specific subcellular compartments. AKAPs have a common RII-binding domain, but contain different targeting motifs responsible for directing PKA to distinct intracellular locations. Three alternatively spliced transcript variants encoding different isoforms have been described.
