

Recombinant Human CTNNA1 Protein, MYC/DDK-tagged, C13 and N15-labeled

Cat. No. CTNNA1-126H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CTNNA1 MS Standard C13 and N15-labeled recombinant protein (NP_001894) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the catenin family of proteins that play an important role in cell adhesion process by connecting cadherins located on the plasma membrane to the actin filaments inside the cell. The encoded mechanosensing protein contains three vinculin homology domains and undergoes conformational changes in response to cytoskeletal tension, resulting in the reconfiguration of cadherin-actin filament connections. Certain mutations in this gene cause butterfly-shaped pigment dystrophy.
