

Recombinant Human SCG2 Protein, MYC/DDK-tagged, C13 and N15-labeled

Cat. No. SCG2-203H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	SCG2 MS Standard C13 and N15-labeled recombinant protein (NP_003460) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The protein encoded by this gene is a member of the chromogranin/secretogranin family of neuroendocrine secretory proteins. Studies in rodents suggest that the full-length protein, secretogranin II, is involved in the packaging or sorting of peptide hormones and neuropeptides into secretory vesicles. The full-length protein is cleaved to produce the active peptide secretoneurin, which exerts chemotaxic effects on specific cell types, and EM66, whose function is unknown.
