

Recombinant Human TPBG Protein, MYC/DDK-tagged, C13 and N15-labeled

Cat. No. TPBG-271H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	TPBG MS Standard C13 and N15-labeled recombinant protein (NP_006661) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a leucine-rich transmembrane glycoprotein that may be involved in cell adhesion. The encoded protein is an oncofetal antigen that is specific to trophoblast cells. In adults this protein is highly expressed in many tumor cells and is associated with poor clinical outcome in numerous cancers. Alternate splicing in the 5' UTR results in multiple transcript variants that encode the same protein. [provided by RefSeq, Oct 2009]
