

Recombinant Human REG3A Protein, MYC/DDK-tagged, C13 and N15-labeled

Cat. No. REG3A-431H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	REG3A MS Standard C13 and N15-labeled recombinant protein (NP_002571) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a pancreatic secretory protein that may be involved in cell proliferation or differentiation. It has similarity to the C-type lectin superfamily. The enhanced expression of this gene is observed during pancreatic inflammation and liver carcinogenesis. The mature protein also functions as an antimicrobial protein with antibacterial activity. Alternate splicing results in multiple transcript variants that encode the same protein. [provided by RefSeq, Nov 2014]
