

## Recombinant Pig BCMA Protein, His-tagged

**Cat. No.** TNFRSF17-03P    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                              |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Pig BCMA Protein(XP_020943721.1), fused to His tag, was expressed in HEK293.                                                                     |
| <b>Species</b>          | Pig                                                                                                                                                          |
| <b>Source</b>           | HEK293                                                                                                                                                       |
| <b>Form</b>             | Supplied as a 0.2 µm filtered solution in PBS (pH 7.4)                                                                                                       |
| <b>Molecular Mass</b>   | The Predicted Molecular Mass is about 6 kDa.                                                                                                                 |
| <b>AA Sequence</b>      | MAQQCYQNEYFDRLLIACKPCRLRCSNTPPVTCQHVCNTMKGTNVHHHHHH                                                                                                          |
| <b>Endotoxin</b>        | <1EU per ug (determined by the LAL method)                                                                                                                   |
| <b>Purity</b>           | >90% as determined by SDS-PAGE                                                                                                                               |
| <b>Storage</b>          | Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles. |
| <b>Concentration</b>    | 1.0 mg/ml                                                                                                                                                    |

### GENE INFORMATION

|                  |                                                                         |
|------------------|-------------------------------------------------------------------------|
| <b>Gene Name</b> | TNFRSF17 TNF receptor superfamily member 17 [ <i>Sus scrofa</i> (pig) ] |
