

Recombinant Human CRY2 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CRY2-647H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CRY2 MS Standard C13 and N15-labeled recombinant protein (NP_066940) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a flavin adenine dinucleotide-binding protein that is a key component of the circadian core oscillator complex, which regulates the circadian clock. This gene is upregulated by CLOCK/ARNTL heterodimers but then represses this upregulation in a feedback loop using PER/CRY heterodimers to interact with CLOCK/ARNTL. Polymorphisms in this gene have been associated with altered sleep patterns. The encoded protein is widely conserved across plants and animals. Two transcript variants encoding different isoforms have been found for this gene.
