

Recombinant Human LRPPRC Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. LRPPRC-804H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	LRPPRC MS Standard C13 and N15-labeled recombinant protein (NP_573566) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a leucine-rich protein that has multiple pentatricopeptide repeats (PPR). The precise role of this protein is unknown but studies suggest it may play a role in cytoskeletal organization, vesicular transport, or in transcriptional regulation of both nuclear and mitochondrial genes. The protein localizes primarily to mitochondria and is predicted to have an N-terminal mitochondrial targeting sequence. Mutations in this gene are associated with the French-Canadian type of Leigh syndrome.
