

Recombinant Human MVP Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. MVP-998H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	MVP MS Standard C13 and N15-labeled recombinant protein (NP_005106) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes the major component of the vault complex. Vaults are multi-subunit ribonucleoprotein structures that may be involved in nucleo-cytoplasmic transport. The encoded protein may play a role in multiple cellular processes by regulating the MAP kinase, JAK/STAT and phosphoinositide 3-kinase/Akt signaling pathways. The encoded protein also plays a role in multidrug resistance, and expression of this gene may be a prognostic marker for several types of cancer. Alternatively spliced transcript variants have been observed for this gene.
