

# Recombinant Human ROGDI Protein, Myc/DDK-tagged, C13 and N15-labeled

**Cat. No.** ROGDI-1374H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | ROGDI MS Standard C13 and N15-labeled recombinant protein (NP_078865) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.                                                                                                                                                                                                               |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                                                                                                             |
| <b>Source</b>           | HEK293                                                                                                                                                                                                                                                                                                                                            |
| <b>Description</b>      | This gene encodes a protein of unknown function. Loss-of-function mutation in this gene cause Kohlschutter-Tonz syndrome. Alternate splicing results in multiple transcript variants.                                                                                                                                                             |
| <b>Molecular Mass</b>   | 32.3 kDa                                                                                                                                                                                                                                                                                                                                          |

|                       |                                                             |
|-----------------------|-------------------------------------------------------------|
| <b>Storage</b>        | Store at -80 centigrade. Avoid repeated freeze-thaw cycles. |
| <b>Concentration</b>  | 50 µg/mL as determined by BCA                               |
| <b>Storage Buffer</b> | 100 mM glycine, 25 mM Tris-HCl, pH 7.3.                     |

## GENE INFORMATION

|                        |                                                                                                                 |
|------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | ROGDI rogdi atypical leucine zipper [ Homo sapiens (human) ]                                                    |
| <b>Official Symbol</b> | ROGDI                                                                                                           |
