

Recombinant Human WTAP Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. WTAP-1453H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	WTAP MS Standard C13 and N15-labeled recombinant protein (NP_690596) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The Wilms tumor suppressor gene WT1 appears to play a role in both transcriptional and posttranscriptional regulation of certain cellular genes. This gene encodes a WT1-associating protein, which is a ubiquitously expressed nuclear protein. Like WT1 protein, this protein is localized throughout the nucleoplasm as well as in speckles and partially colocalizes with splicing factors. Alternative splicing of this gene results in several transcript variants encoding three different isoforms.
