

Recombinant Human BID Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. BID-1625H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	BID MS Standard C13 and N15-labeled recombinant protein (NP_001187) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a death agonist that heterodimerizes with either agonist BAX or antagonist BCL2, and thus regulate apoptosis. The encoded protein is a member of the BCL-2 family of cell death regulators. It is a mediator of mitochondrial damage induced by caspase-8 (CASP8); CASP8 cleaves this encoded protein, and the COOH-terminal part translocates to mitochondria where it triggers cytochrome c release. Multiple alternatively spliced transcript variants have been found, but the full-length nature of some variants has not been defined.
