

Recombinant Human POU6F1, His-tagged

Cat. No. POU6F1-7615H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human POU6F1 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography techniques.
Species	Human
Source	E.coli
ProteinLength	1-301aa
Description	POU6F1 belongs to the POU transcription factor family. This protein is transcription factor that binds preferentially to a variant of the octamer motif (5"-ATGATAAT-3"). In the embryo, it is expressed exclusively in the developing brain, whereas in the adult its expression is restricted to brain, heart, skeletal muscle and lung. In the brain, the highest expression levels are found in specific cell layers of the cortex, the olfactory bulb, the hippocampus and the cerebellum.
Form	Liquid. In 20mM Tris-HCl buffer (pH 8.0) containing 0.15M NaCl, 20% glycerol, 1mM DTT.
Molecular Mass	35kDa (324aa)
