

Recombinant Human AK5 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. AK5-1847H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	AK5 MS Standard C13 and N15-labeled recombinant protein (NP_777283) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the adenylate kinase family, which is involved in regulating the adenine nucleotide composition within a cell by catalyzing the reversible transfer of phosphate groups among adenine nucleotides. This member is related to the UMP/CMP kinase of several species. It is located in the cytosol and expressed exclusively in brain. Alternatively spliced transcript variants encoding distinct isoforms have been identified for this gene.
