

Recombinant Human NVL Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. NVL-1855H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	NVL MS Standard C13 and N15-labeled recombinant protein (NP_002524) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the AAA (ATPases associated with diverse cellular activities) superfamily. Multiple transcript variants encoding different isoforms have been found for this gene. Two encoded proteins, described as major and minor isoforms, have been localized to distinct regions of the nucleus. The largest encoded protein (major isoform) has been localized to the nucleolus and shown to participate in ribosome biosynthesis (PMID: 15469983, 16782053), while the minor isoform has been localized to the nucleoplasm.
