

Recombinant Human AMOT Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. AMOT-1871H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	AMOT MS Standard C13 and N15-labeled recombinant protein (NP_573572) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene belongs to the motin family of angiostatin binding proteins characterized by conserved coiled-coil domains and C-terminal PDZ binding motifs. The encoded protein is expressed predominantly in endothelial cells of capillaries as well as larger vessels of the placenta where it may mediate the inhibitory effect of angiostatin on tube formation and the migration of endothelial cells toward growth factors during the formation of new blood vessels. Alternative splicing results in multiple transcript variants encoding different isoforms.
