

Recombinant Human CRY1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CRY1-2082H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CRY1 MS Standard C13 and N15-labeled recombinant protein (NP_004066) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a flavin adenine dinucleotide-binding protein that is a key component of the circadian core oscillator complex, which regulates the circadian clock. This gene is upregulated by CLOCK/ARNTL heterodimers but then represses this upregulation in a feedback loop using PER/CRY heterodimers to interact with CLOCK/ARNTL. Polymorphisms in this gene have been associated with altered sleep patterns. The encoded protein is widely conserved across plants and animals. Loss of the related gene in mouse results in a shortened circadian cycle in complete darkness.
