

Recombinant Human COL6A2 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. COL6A2-2710H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	COL6A2 MS Standard C13 and N15-labeled recombinant protein (NP_478054) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes one of the three alpha chains of type VI collagen, a beaded filament collagen found in most connective tissues. The product of this gene contains several domains similar to von Willebrand Factor type A domains. These domains have been shown to bind extracellular matrix proteins, an interaction that explains the importance of this collagen in organizing matrix components. Mutations in this gene are associated with Bethlem myopathy and Ullrich scleroatonic muscular dystrophy. Three transcript variants have been identified for this gene.
