Recombinant Human AGL Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. AGL-2755H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	AGL MS Standard C13 and N15-labeled recombinant protein (NP_000633) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes the glycogen debrancher enzyme which is involved in glycogen degradation. This enzyme has two independent catalytic activities which occur at different sites on the protein: a 4-alpha-glucotransferase activity and a amylo-1,6-glucosidase activity. Mutations in this gene are associated with glycogen storage disease although a wide range of enzymatic and clinical variability occurs which may be due to tissue-specific alternative splicing. Alternatively spliced transcripts encoding different isoforms have been described.
