

Recombinant Human PTK6 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. PTK6-2801H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	PTK6 MS Standard C13 and N15-labeled recombinant protein (NP_005966) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The protein encoded by this gene is a cytoplasmic nonreceptor protein kinase which may function as an intracellular signal transducer in epithelial tissues. Overexpression of this gene in mammary epithelial cells leads to sensitization of the cells to epidermal growth factor and results in a partially transformed phenotype. Expression of this gene has been detected at low levels in some breast tumors but not in normal breast tissue. The encoded protein has been shown to undergo autophosphorylation. Alternative splicing results in multiple transcript variants.
