

Recombinant Human SND1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. SND1-2854H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	SND1 MS Standard C13 and N15-labeled recombinant protein (NP_055205) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a transcriptional co-activator that interacts with the acidic domain of Epstein-Barr virus nuclear antigen 2 (EBNA 2), a transcriptional activator that is required for B-lymphocyte transformation. Other transcription factors that interact with this protein are signal transducers and activators of transcription, STATs. This protein is also thought to be essential for normal cell growth. A similar protein in mammals and other organisms is a component of the RNA-induced silencing complex (RISC).
Molecular Mass	102 kDa

Purity > 80% as determined by SDS-PAGE and Coomassie blue staining

Stability Stable for 3 months from receipt of products under proper storage and handling conditions.

Storage Store at -80 centigrade. Avoid repeated freeze-thaw cycles.

Concentration 50 µg/mL as determined by BCA

Storage Buffer 100 mM glycine, 25 mM Tris-HCl, pH 7.3.

GENE INFORMATION

Gene Name SND1 staphylococcal nuclease and tudor domain containing 1 [Homo sapiens (human)]

Official Symbol SND1

Synonyms SND1; staphylococcal nuclease and tudor domain containing 1; staphylococcal nuclease domain-containing protein 1; p100; p100 EBNA2 co activator; TDRD11;
