

Recombinant Human C3 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. C3-3052H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	C3 MS Standard C13 and N15-labeled recombinant protein (NP_000055) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	Complement component C3 plays a central role in the activation of complement system. Its activation is required for both classical and alternative complement activation pathways. The encoded preproprotein is proteolytically processed to generate alpha and beta subunits that form the mature protein, which is then further processed to generate numerous peptide products. The C3a peptide, also known as the C3a anaphylatoxin, modulates inflammation and possesses antimicrobial activity. Mutations in this gene are associated with atypical hemolytic uremic syndrome and age-related macular degeneration in human patients.
