

Recombinant Human FGF19 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. FGF19-3206H Lot. No. (See product label)

SPECIFICATION

Product Overview	FGF19 MS Standard C13 and N15-labeled recombinant protein (NP_005108) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes including embryonic development cell growth, morphogenesis, tissue repair, tumor growth and invasion. This growth factor is a high affinity, heparin dependent ligand for FGFR4. Expression of this gene was detected only in fetal but not adult brain tissue. Synergistic interaction of the chick homolog and Wnt-8c has been shown to be required for initiation of inner ear development.
