

Recombinant Human CUL3 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CUL3-3799H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CUL3 MS Standard C13 and N15-labeled recombinant protein (NP_003581) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the cullin protein family. The encoded protein plays a critical role in the polyubiquitination and subsequent degradation of specific protein substrates as the core component and scaffold protein of an E3 ubiquitin ligase complex. Complexes including the encoded protein may also play a role in late endosome maturation. Mutations in this gene are a cause of type 2E pseudohypoaldosteronism. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
