

Recombinant Human TNMD Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. TNMD-3952H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	TNMD MS Standard C13 and N15-labeled recombinant protein (NP_071427) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a protein that is related to chondromodulin-I, which is a cartilage-specific glycoprotein that functions to stimulate chondrocyte growth and to inhibit tube formation of endothelial cells. This protein is also an angiogenesis inhibitor. Genetic variation in this gene is associated with a risk for type 2 diabetes, central obesity and serum levels of systemic immune mediators in a body size-dependent manner. This gene is also a candidate gene for age-related macular degeneration, though a direct link has yet to be demonstrated.
