

Recombinant Human ASIC4 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. ASIC4-4179H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	ACCN4 MS Standard C13 and N15-labeled recombinant protein (NP_061144) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene belongs to the superfamily of acid-sensing ion channels, which are proton-gated, amiloride-sensitive sodium channels. These channels have been implicated in synaptic transmission, pain perception as well as mechanoperception. This gene is predominantly expressed in the pituitary gland, and was considered a candidate for paroxysmal dystonic choreoathetosis (PDC), a movement disorder, however, no correlation was found between mutations in this gene and PDC.
Molecular Mass	72 kDa
