

Recombinant Human TBCE Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. TBCE-4632H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	TBCE MS Standard C13 and N15-labeled recombinant protein (NP_003184) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	Cofactor E is one of four proteins (cofactors A, D, E, and C) involved in the pathway leading to correctly folded beta-tubulin from folding intermediates. Cofactors A and D are believed to play a role in capturing and stabilizing beta-tubulin intermediates in a quasi-native confirmation. Cofactor E binds to the cofactor D/beta-tubulin complex; interaction with cofactor C then causes the release of beta-tubulin polypeptides that are committed to the native state. Two transcript variants encoding the same protein have been found for this gene.
