

Recombinant Human THNSL2 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. THNSL2-4671H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	THNSL2 MS Standard C13 and N15-labeled recombinant protein (NP_060741) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a threonine synthase-like protein. A similar enzyme in mouse can catalyze the degradation of O-phospho-homoserine to a-ketobutyrate, phosphate, and ammonia. This protein also has phospho-lyase activity on both gamma and beta phosphorylated substrates. In mouse an alternatively spliced form of this protein has been shown to act as a cytokine and can induce the production of the inflammatory cytokine IL6 in osteoblasts. Alternate splicing results in multiple transcript variants.
Molecular Mass	53.9 kDa
