

Recombinant Human CETN1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CETN1-4724H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CETN1 MS Standard C13 and N15-labeled recombinant protein (NP_004057) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The protein encoded by this gene plays important roles in the determination of centrosome position and segregation, and in the process of microtubule severing. This protein is localized to the centrosome of interphase cells, and redistributes to the region of the spindle poles during mitosis, reflecting the dynamic behavior of the centrosome during the cell cycle.
