

Recombinant Human ARX Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. ARX-4868H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	ARX MS Standard C13 and N15-labeled recombinant protein (NP_620689) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene is a homeobox-containing gene expressed during development. The expressed protein contains two conserved domains, a C-peptide (or aristaless domain) and the prd-like class homeobox domain. It is a member of the group-II aristaless-related protein family whose members are expressed primarily in the central and/or peripheral nervous system. This gene is thought to be involved in CNS development. Expansion of a polyalanine tract and other mutations in this gene cause X-linked cognitive disability and epilepsy.
