

Recombinant Human POT1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. POT1-5057H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	POT1 MS Standard C13 and N15-labeled recombinant protein (NP_056265) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene is a member of the telombin family and encodes a nuclear protein involved in telomere maintenance. Specifically, this protein functions as a member of a multi-protein complex that binds to the TTAGGG repeats of telomeres, regulating telomere length and protecting chromosome ends from illegitimate recombination, catastrophic chromosome instability, and abnormal chromosome segregation. Increased transcriptional expression of this gene is associated with stomach carcinogenesis and its progression. Alternatively spliced transcript variants have been described.
