

Recombinant Human CTNND1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CTNND1-5079H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CTNND1 MS Standard C13 and N15-labeled recombinant protein (NP_001078927) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the Armadillo protein family, which function in adhesion between cells and signal transduction. Multiple translation initiation codons and alternative splicing result in many different isoforms being translated. Not all of the full-length natures of the described transcript variants have been determined. Read-through transcription also exists between this gene and the neighboring upstream thioredoxin-related transmembrane protein 2 (TMX2) gene.
Molecular Mass	108.2 kDa
