

Recombinant Human ADAMTSL1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. ADAMTSL1-5240H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	ADAMTSL1 MS Standard C13 and N15-labeled recombinant protein (NP_443098) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a secreted protein and member of the ADAMTS (a disintegrin and metalloproteinase with thrombospondin motif) family. This protein lacks the metalloproteinase and disintegrin-like domains, which are typical of the ADAMTS family, but contains other ADAMTS domains, including the thrombospondin type 1 motif. This protein may have important functions in the extracellular matrix. Alternative splicing results in multiple transcript variants encoding distinct proteins.
