

Recombinant Human DHX32 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. DHX32-5271H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	DHX32 MS Standard C13 and N15-labeled recombinant protein (NP_060650) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	DEAD box proteins, characterized by the conserved motif Asp-Glu-Ala-Asp (DEAD), are putative RNA helicases. They are implicated in a number of cellular processes involving alteration of RNA secondary structure such as translation initiation, nuclear and mitochondrial splicing, and ribosome and spliceosome assembly. Based on their distribution patterns, some members of this DEAD box protein family are believed to be involved in embryogenesis, spermatogenesis, and cellular growth and division. This gene encodes a member of this family. The function of this member has not been determined. Alternative splicing of this gene generates 2 transcript variants, but the full length nature of one of the variants has not been defined.
Molecular Mass	84.4 kDa
