

Recombinant Human PRKG2 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. PRKG2-5332H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	PRKG2 MS Standard C13 and N15-labeled recombinant protein (NP_006250) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a protein that belongs to the serine/threonine protein kinase family of proteins. The encoded protein binds to and inhibits the activation of several receptor tyrosine kinases. The membrane-bound protein is a regulator of intestinal secretion, bone growth and renin secretion. Alternate splicing results in multiple transcript variants encoding distinct isoforms whose regulatory N-termini differ in length but whose C-terminal catalytic domains are identical.
Molecular Mass	87.3 kDa
