

Recombinant Human SOX6 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. SOX6-5407H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	SOX6 MS Standard C13 and N15-labeled recombinant protein (NP_201583) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the D subfamily of sex determining region y-related transcription factors that are characterized by a conserved DNA-binding domain termed the high mobility group box and by their ability to bind the minor groove of DNA. The encoded protein is a transcriptional activator that is required for normal development of the central nervous system, chondrogenesis and maintenance of cardiac and skeletal muscle cells. The encoded protein interacts with other family members to cooperatively activate gene expression. Alternative splicing results in multiple transcript variants.
