

Recombinant Human ARCN1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. ARCN1-5482H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	ARCN1 MS Standard C13 and N15-labeled recombinant protein (NP_001646) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene maps in a region, which include the mixed lineage leukemia and Friend leukemia virus integration 1 genes, where multiple disease-associated chromosome translocations occur. It is an intracellular protein. Archain sequences are well conserved among eukaryotes and this protein may play a fundamental role in eukaryotic cell biology. It has similarities to heat shock proteins and clathrin-associated proteins, and may be involved in vesicle structure or trafficking.
Molecular Mass	57.2 kDa
