

Recombinant Human ACTRT2 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. ACTRT2-5734H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	ACTRT2 MS Standard C13 and N15-labeled recombinant protein (NP_536356) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The protein encoded by this intronless gene belongs to the actin family. Studies have shown that this protein may be involved in cytoskeletal organization similar to other cytoplasmic actin-related protein (ARP) subfamily members. Antibody raised against the human protein has been used to detect the protein by immunoblotting and immunofluorescence microscopy, demonstrating its specific synthesis in the testis, late in spermatid differentiation, and its localization in the calyx.
