

Recombinant Human CENPT Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CENPT-5871H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CENPT MS Standard C13 and N15-labeled recombinant protein (NP_079358) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	The centromere is a specialized chromatin domain, present throughout the cell cycle, that acts as a platform on which the transient assembly of the kinetochore occurs during mitosis. All active centromeres are characterized by the presence of long arrays of nucleosomes in which CENPA replaces histone H3. CENPT is an additional factor required for centromere assembly.
