

Recombinant Human SLC30A10 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. SLC30A10-5965H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	SLC30A10 MS Standard C13 and N15-labeled recombinant protein (NP_061183) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene is highly expressed in the liver and is inducible by manganese. Its protein product appears to be critical in maintaining manganese levels, and has higher specificity for manganese than zinc. Loss of function mutations appear to result in a pleomorphic phenotype, including dystonia and adult-onset parkinsonism. Alternatively spliced transcript variants have been observed for this gene.
Molecular Mass	52.5 kDa
