

Recombinant Human SNCA Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. SNCA-5970H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	SNCA MS Standard C13 and N15-labeled recombinant protein (NP_009292) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	Alpha-synuclein is a member of the synuclein family, which also includes beta- and gamma-synuclein. Synucleins are abundantly expressed in the brain and alpha- and beta-synuclein inhibit phospholipase D2 selectively. SNCA may serve to integrate presynaptic signaling and membrane trafficking. Defects in SNCA have been implicated in the pathogenesis of Parkinson disease. SNCA peptides are a major component of amyloid plaques in the brains of patients with Alzheimer's disease. Alternatively spliced transcripts encoding different isoforms have been identified for this gene.
