

Recombinant Human CHAC1 Protein, Myc/DDK-tagged, C13 and N15-labeled

Cat. No. CHAC1-5990H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	CHAC1 MS Standard C13 and N15-labeled recombinant protein (NP_077016) with a C-terminal MYC/DDK tag, was expressed in HEK293 cells.
Species	Human
Source	HEK293
Description	This gene encodes a member of the gamma-glutamylcyclotransferase family of proteins. The encoded protein has been shown to promote neuronal differentiation by deglycation of the Notch receptor, which prevents receptor maturation and inhibits Notch signaling. This protein may also play a role in the unfolded protein response, and in regulation of glutathione levels and oxidative balance in the cell. Elevated expression of this gene may indicate increased risk of cancer recurrence among breast and ovarian cancer patients.
